EXPERIENCE

David Paul is one of the most charismatic change and leadership specialists you will ever meet. An experienced adult educator, advisor, mentor and coach to senior executives, CEOs and heads of government, David is a specialist in complex change and leadership in people and organisations. David teaches in post-graduate management and leadership programs at UTS, Macquarie University, Paris, USA and in China. Specialising in complex change management and Eupsychian Leadership, David regularly advises public and private companies and their senior executives in the area of large scale change and organisational transformation. Part of this role involves providing executive coaching and mentoring for CEO's and senior business leaders.

David brings to the program a natural ability to work with people to bring out their best. Added to this are highly developed problem solving abilities and people skills, honed through 25 years experience in Business consulting, strategy development, change management, corporate communications, project management & management education.

David has worked with members of the 2008 Beijing Olympic Committee on Change and People management. Committee members include High Commissioners, Olympic champions and directors of large companies. In 2006, he was appointed as the Program Director of Leadership and Management at the Macquarie University's Centre for Professional Development. In 2009 – 2010, David has worked with major transformational integration of HBOS, Bankwest with the CBA of Australia.

David's research and ideas have been discussed in major Australian newspapers and radio. He is also a mentor and coach to chief and senior executives in both public and private companies and has been invited to the White House to provide his expertise in leadership and change management.

David balances consulting and mentoring with regular lecturing. He has worked with organisations such as Government of Victoria, Westpac, NRMA, Macquarie Bank to develop effective communication strategies, which have tailored knowledge and information to each business unit. Strategies implemented utilised advanced communication technology to reduce costs and produce sustainable outcomes.
